**New GE Autosampler Enhances InnovOx TOC Analyzer Productivity**

GE Analytical Instruments announces its new GE Autosampler for the Sievers InnovOx Laboratory Total Organic Carbon (TOC) Analyzer. Featuring a robust new design for handling high-volume laboratory applications, the GE Autosampler can run up to 135 samples tubes and up to 63 40-mL or 60-mL vials in one protocol. It has unparalleled needle-to-position accuracy, and comes with a needle rinse station. It is available with an optional, patent pending, stirring device to ensure homogeneous samples.

The GE Autosampler easily integrates with the Sievers InnovOx Laboratory TOC Analyzer, which can handle the toughest TOC samples. To learn more about the GE Autosampler or the Sievers InnovOx Laboratory TOC Analyzer, visit [www.geinstruments.com](http://www.geinstruments.com) or contact [geai@ge.com](mailto:geai@ge.com) to schedule an on-site demo.
